Killer Tomato style target balloons by American Pacific

Radar reflective model #NSN-6920DHR shown. Like NSN 6920-000-868 9847

We offer 2 target balloon models to choose from. Portions of these products may be covered by US patent 6,592,416 B1 issued 2003

1. NSN-6920D Original style balloon + integrated automatic drogue chute.
2. NSN-6920DHR Original style balloon + drogue chute + reflectors to enhance radar signature.

1. **\$390 each #NSN-6920D - Original Killer Tomato style target balloon includes:**

- **An integrated drogue chute that automatically self deploys.**
 - Eliminates the purchase and rigging of a separate sea anchor to reduce wind drift.
 - Easy to launch - One piece integral chute design is easy to set up and launch because the drogue chute automatically self deploys. No separate parts, no experience is required.
 - The integral drogue chute eliminates spinning, tumbling and deals with more demanding sea state situations better than a separate sea anchor.
 - Can be recovered or towed by the floating drogue chute recovery line at slow speeds.
- Weight: 55 lbs dimensions: 10' x 10' x 10' before inflation - inflated size 14' x 14' X 14'
- Shipping carton measurements 26"x 7"x 17" = 1.79 cubic feet.

2. \$490 each #NSN – 6920DHR - Original Killer Tomato style target balloon includes both:

- **Radar reflectors for Enhanced radar signature detectable from 6+ miles in moderate #2 sea state.**
- **An integrated drogue chute that automatically self deploys.**
 - Eliminates the purchase and rigging of a separate sea anchor to reduce wind drift.
 - Easy to launch - One piece integral chute design is easy to set up and launch because the drogue chute automatically self deploys. No separate parts, no experience is required.
 - The integral drogue chute eliminates spinning, tumbling and deals with more demanding sea state situations better than a separate sea anchor.
 - Can be recovered or towed by the floating drogue chute recovery line at slow speeds.
- Weight: 55 lbs dimensions: 10' x 10' x 10' before inflation, inflated size 14' x 14' x 14'
- Shipping carton measurements 26"x 7"x 17" = 1.79 cubic feet.
